Subject:	Fw: Oracle Design Script for Cheminv
Attachments:	OracleBuild_Cheminv.sql; R1_Cheminv_SOP.pdf

Attached below is the design document that your IT support would need to replicate the database component of the chemical inventory system we have in place in the EPA New England Regional Laboratory. If any of you are moving toward implementing such as system and need some additional one-on-one help to make that happen, please let me know and I can at least be a conduit for getting you the information you need.

Sincerely,

Ernest Waterman, Chief
Investigations and Analysis Unit
Office of Environmental Measurement and Evaluation
US EPA, New England Region
11 Technology Drive
North Chelmsford, MA 01863

Subject: Oracle Design Script for Cheminv

Ernie, here are the scripts I use to build the database in Oracle. As mentioned, the front end is Borland Delphi, a client/server tool that is not easily portable.

(See attached file: OracleBuild_Cheminv.sql)

Also, here is the SOP document that has some screen shots of the Chemical Inventory Application.

(See attached file: R1_Cheminv_SOP.pdf)

Phil Warren
